Webinar on Integrated coastal management using biosphere reserves or Satoumi

Webinar on Integrated coastal management using biosphere reserves or Satoumi

Iran time 9:50am- 11:45am (Japan time 15:20-17:15), February 13 (Sat), 2021

Language: English Flyer

Coastal areas and these ecosystem services are used in a variety of ways. Therefore, it is necessary to coordinate the use by various stakeholders. Marine spatial planning is the guideline for this, and it is important to agree on integrated coastal zone management. UNESCO’s MAB programme, which aims to balance between human activities and conservation, consolidates its practices in biosphere reserves. In this seminar, we would like to consider discuss about marine management using the example of BR/GP in Qeshm Island, Iran.

Programme (Japan time)

- 15:20- Opening Remark by Hiroyuki Matsuda (Yokohama National University)
- 15:30-16:00 “Coastal Management on Qeshm Island”. by Ehsan Kamrani (Hormozgan University)
- 16:00-16:30 “UNESCO Global Geopark and Biosphere Reserve in Qeshm Island” by Jiro Iguchi (PADECO Co. Ltd.)
- 16:30-17:00 “Fisheries Management Toolbox: Self-assessment scheme for fishers to improve fisheries co-management in Japanese coastal fisheries” by Mitsutaku Makino (U.Tokyo, IOC Japan Committee)
- 17:00– 17:15 Discussion moderated by Hiroyuki Matsuda (Yokohama National University)
- 17:00-17:05: Comments by Shin-ichiro Kakuma (Saga University)
